

# Lecture 0 – Course Overview

## COSE215: Theory of Computation

Jihyeok Park

2023 Spring

- **Instructor:** Jihyeok Park (박지혁)
  - **Position:** Assistant Professor in CS, Korea University
  - **Expertise:** Programming Languages, Software Analysis
  - **Office hours:** 14:00–16:00, Tuesdays (by appointment)
  - **Office:** 609A, Science Library Bldg
  - **Email:** jihyeok\_park@korea.ac.kr
- **Class:** COSE215 - 02 (English) - **Only for CS students**
- **Lectures** 14:00–15:15, Mondays and Wednesdays @ 302 Aegineung
- **Homepage:** <https://plrg.korea.ac.kr/courses/cose215/>
- Please use **blackboard** when asking questions

- There exists a **lecture** on **Apr. 26 (Wed.)**
- **No lecture** in the **final exam week** (Jun. 15–Jun. 21).

Weak	Contents
1	Basic Concepts
2	Deterministic Finite Automata (DFA)
3	Nondeterministic Finite Automata (NFA)
4	Regular Expressions and Languages
5	Properties of Regular Languages
6	Context-Free Grammars and Languages
7	Parse Trees and Ambiguity
8	<b>Midterm Exam (Apr. 24 - Mon.)</b>
9	Pushdown Automata
10	Deterministic Pushdown Automata
11	Properties of Context-Free Languages
11	Turing Machines
12	Extensions of Turing Machines
13	Undecidability
14	P, NP, and NP-Completeness
15	<b>Final Exam (Jun. 14 - Wed.)</b>

- **5–7 Homework Assignments: 20%**
  - Handwritten assignments (submission in class)
  - Programming assignments in Scala (submission in blackboard)
  - You can utilize or refer to any other materials (e.g., ChatGPT), but you **MUST** write your **OWN** solution.
  - **Cheating is strictly prohibited. Cheating will get you an F.**
- **Midterm exam: 30%**
  - April 24 (Mon.) 14:00 – 15:15 (in class, 75 min.)
- **Final exam: 40%**
  - June 14 (Wed.) 14:00 – 15:15 (in class, 75 min.)
- **Attendance and Participation: 10%**
  - Please use **blackboard** to attend the class.

- Self-contained lecture notes.

John E. Hopcroft, Rajeev Motwani, Jeffrey D. Ullman. Introduction to automata theory, languages, and computation. Third edition.

- What is the *mathematical model* of computers?

- What is the *mathematical model* of computers?

## Turing Machine!

Let's learn **Turing Machine**

- What is the *mathematical model* of computers?

## Turing Machine!

Let's learn **Turing Machine**

- Is it possible to solve *every problem* using computers?

- What is the *mathematical model* of computers?

## Turing Machine!

Let's learn **Turing Machine**

- Is it possible to solve *every problem* using computers?

**No!**

Let's learn **Undecidability** and **Interactability**

- **Finite Automata (FA)**

- Regular Expressions and Languages
- Applications: text search, etc.

- **Pushdown Automata (PDA)**

- Context-Free Grammars (CFGs) and Languages (CFLs)
- Applications: programming languages, natural language processing, etc.

- **Turing Machines**

- Universal Turing Machine
- Undecidability and Interactability

- A Turing machine is a specific kind of **abstract machine**.

- A Turing machine is a specific kind of **abstract machine**.
- Then, what is an **abstract machine**?

- A Turing machine is a specific kind of **abstract machine**.
- Then, what is an **abstract machine**?
  - **Example)**

- A Turing machine is a specific kind of **abstract machine**.
- Then, what is an **abstract machine**?
  - **Example)**

- A Turing machine is a specific kind of **abstract machine**.
- Then, what is an **abstract machine**?
  - **Example)**

- A Turing machine is a specific kind of **abstract machine**.
- Then, what is an **abstract machine**?
  - **Example)**

## Theorem

*The current state is OFF if and only if the button is pushed even times.*

## Theorem

*The current state is OFF if and only if the button is pushed even times.*

- Is it possible to prove it?

## Theorem

*The current state is OFF if and only if the button is pushed even times.*

- Is it possible to prove it?

Let's learn **mathematical background and notation**.

## Theorem

*The current state is OFF if and only if the button is pushed even times.*

- Is it possible to prove it?

Let's learn **mathematical background and notation**.

- Is it possible to implement the abstract machine?

## Theorem

*The current state is OFF if and only if the button is pushed even times.*

- Is it possible to prove it?

Let's learn **mathematical background and notation**.

- Is it possible to implement the abstract machine?

Let's learn **Scala** as an implementation language.

- Mathematical backgrounds and notation
- Basic introduction of Scala
